

Professional quality VS universal quality (7inch mirror monitor for truck)

Product looks same, but everything is not same in details.

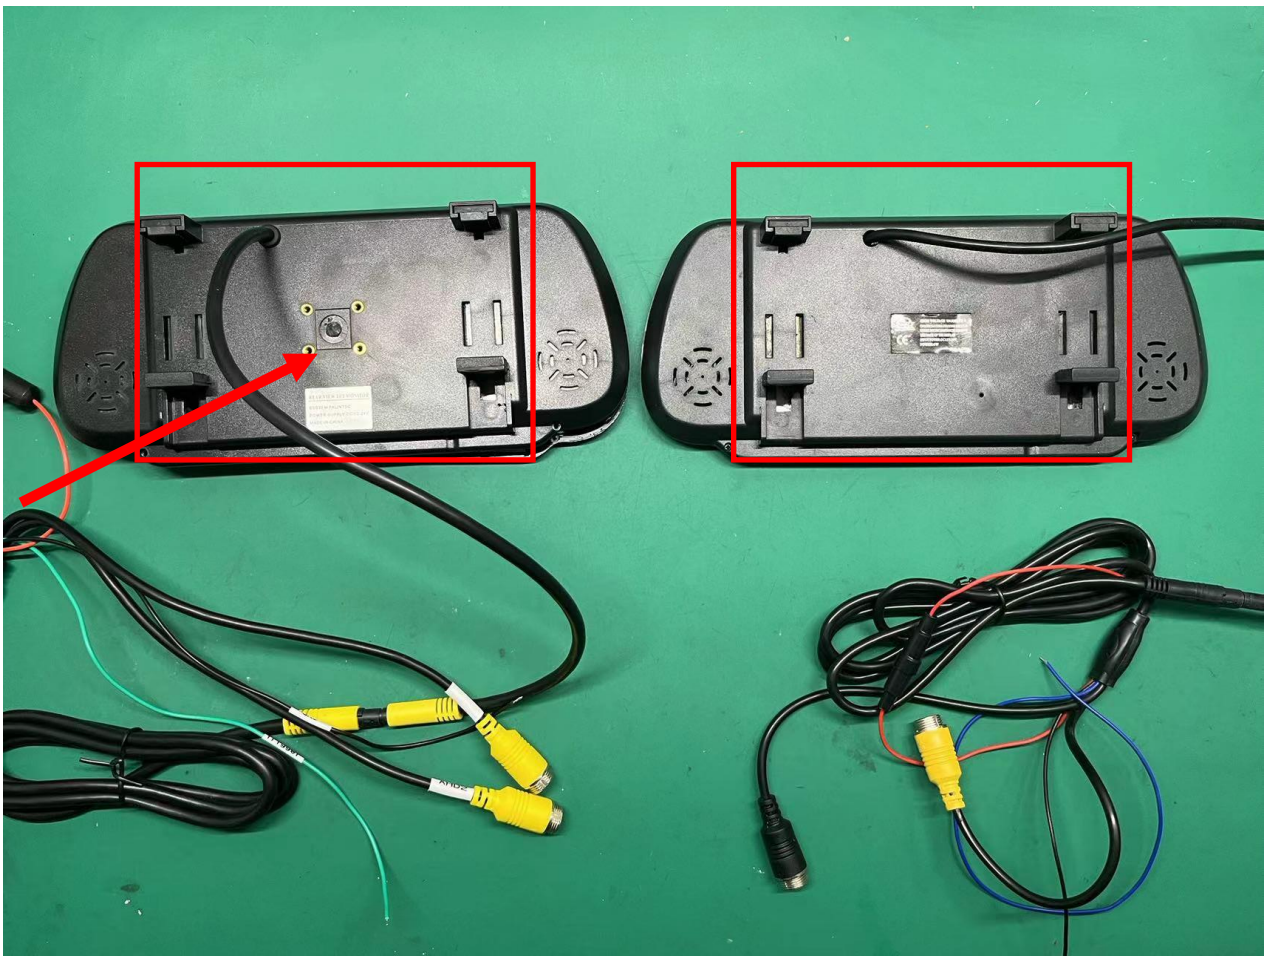

1. Professional one use bigger and more stable conntor

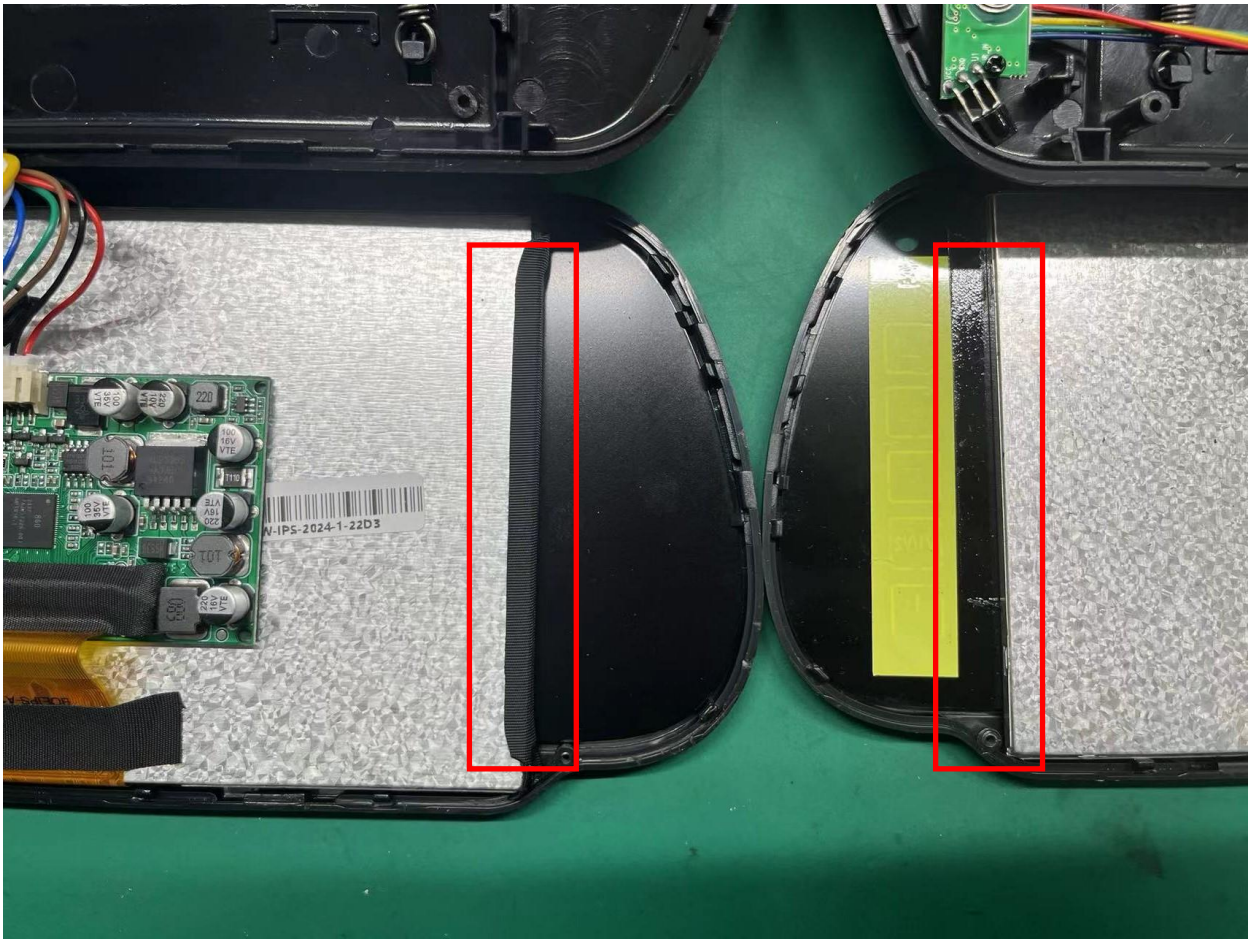

2. Professional one use better harness and thick cable

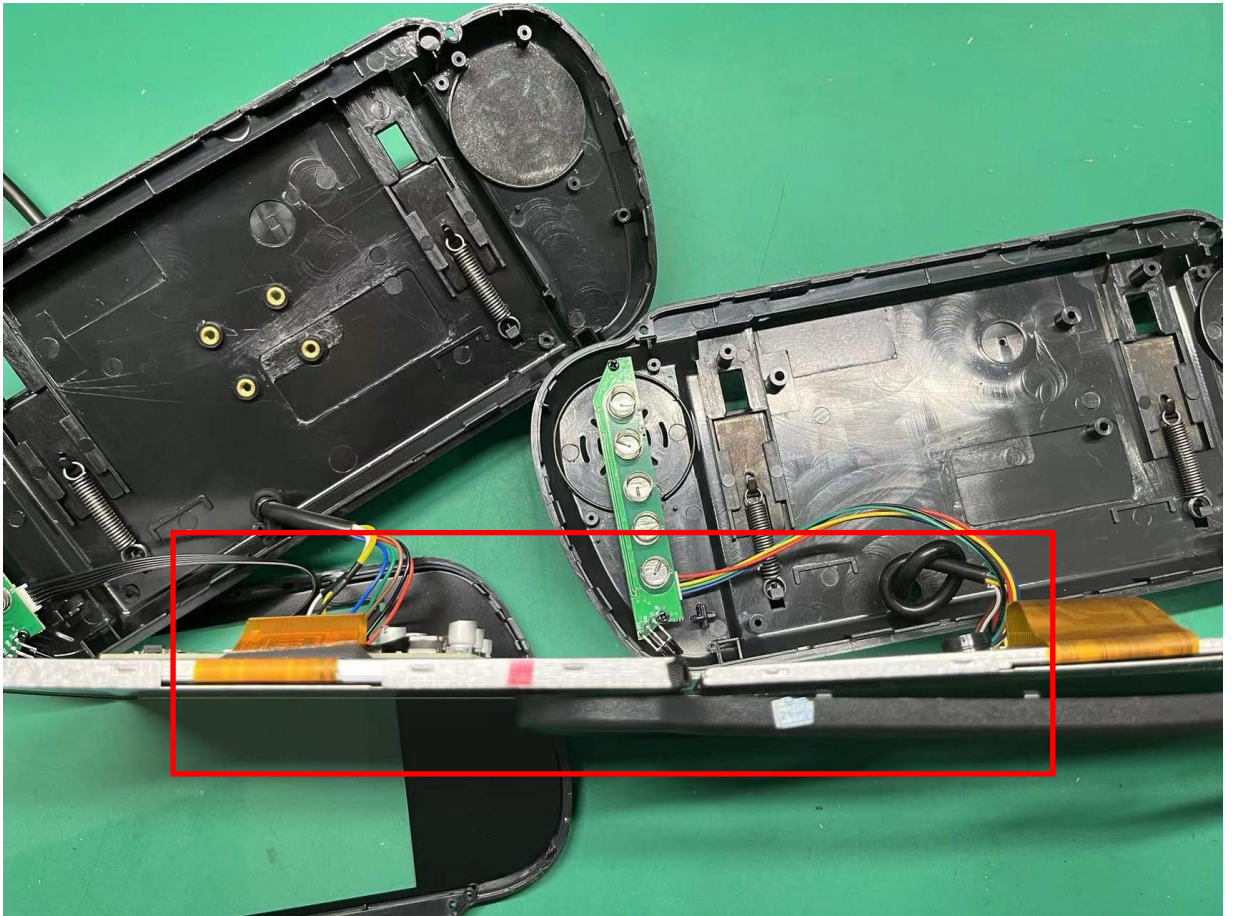

3. Professional one have two optina to install

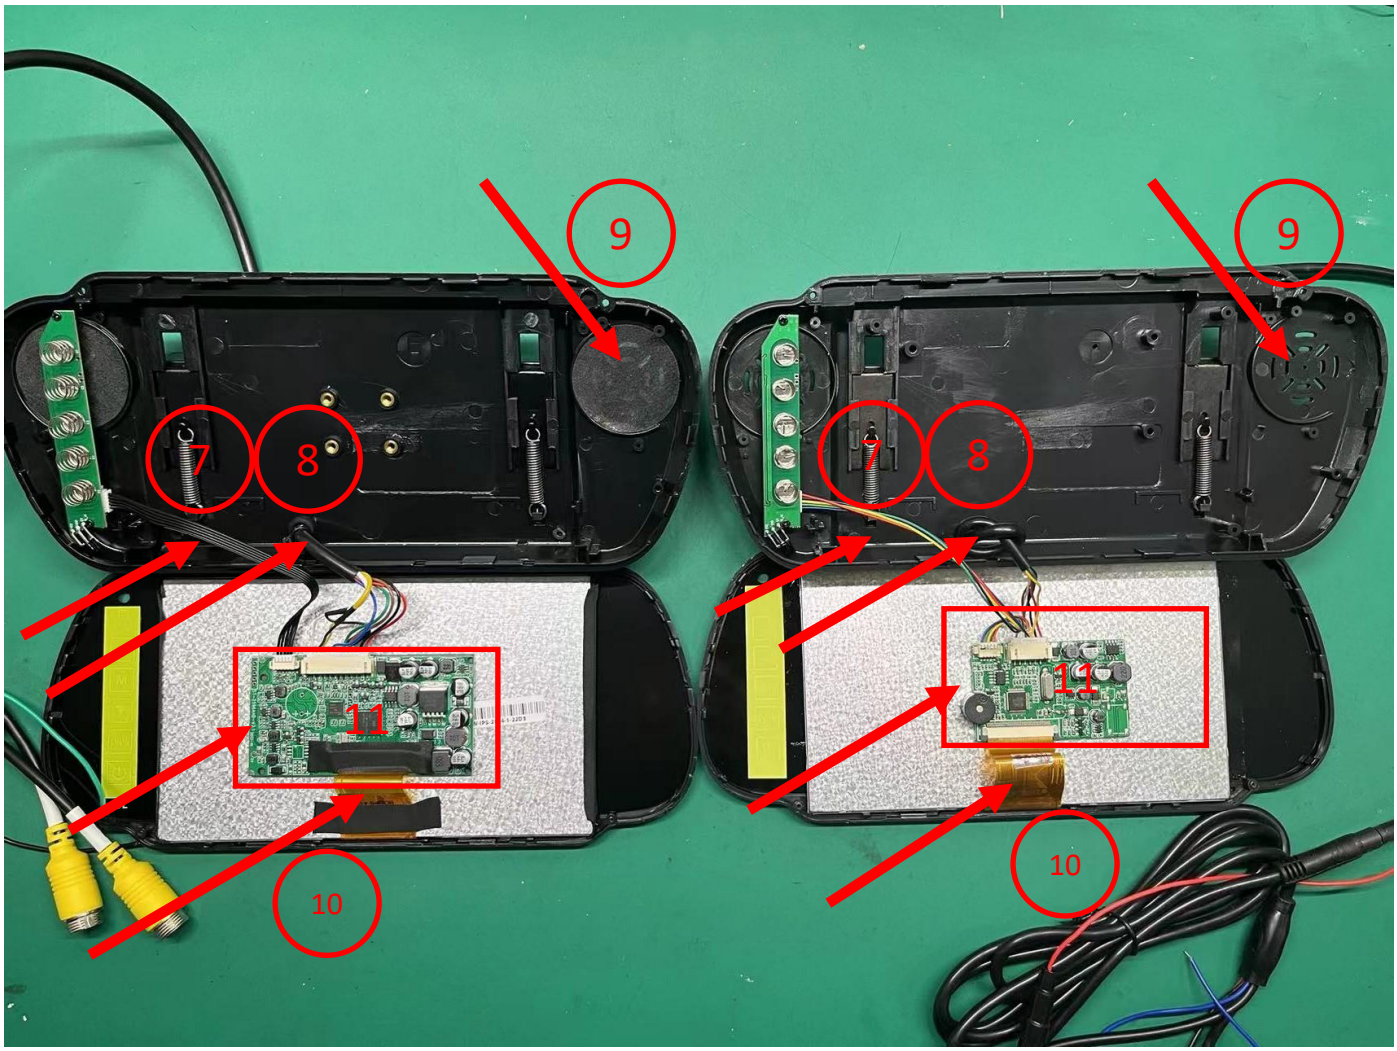

4. Professional one use solid pole, rather empty pole

5. Professional one use tap to protect the screen

6. Professional one use MUCH THICK SCREEN

7. Professional one Centralized wiring,rather sample cable

8. Professional one Ties to fixed the cable,rather tie itself

9.Professional one use sponge to stop dust get into

10. Professional one use sticker to fix the cable in case issue

11. Professional one USE MUCH BIGGER PCB AND IC
