1、Precautions

Before installation and use, please read the instruction manual carefully so that you can use and protect your machine correctly. The front part of this manual is the precautions and introduction to installation and use, please read it first.

➤ **Precautions**

- In order to protect your rights, please read this manual carefully before installing and using this product.
- This product is used in the car, in order to prevent the danger of short circuit or electric shock, please do not put the machine in rain or humid environment.
- This product is a high-tech device, and there are almost no original parts in the machine that the user can repair. In the event of a malfunction, a qualified technician must be called for overhaul, or contact the dealer.

➤ **Installation Environment**

- This equipment uses DC 9~36V power supply, and the local power supply voltage must be confirmed before use;
- If the machine will not be used for a long time, it is best to completely disconnect the power supply of the recorder;
- Please choose an appropriate installation location so that the air can circulate freely around the machine to prevent the machine from overheating;
- The machine cannot be installed near heat sources such as radiators and ventilation ducts, or in places with direct sunlight, excessive dust, mechanical vibration or shock.

2、 Product Specifications

The 8-way all-in-one machine is a cost-effective and highly scalable all-in-one machine specially developed for video surveillance and remote monitoring of heavy trucks and engineering vehicles. It is developed with high-speed processor and embedded **Linux** platform, with built-in AI algorithm, to assist drivers in driving safety, combined with the most advanced **H.265** video compression/decompression technology in the IT field, using **TF card** as storage medium, the eight-way integrated machine can achieve 8-channel 1080P audio and video recording and car driving information recording function.

Product Specifications:

Features:

- Support 1-8 channels of AHD million high-definition / analog standard definition video and audio input;
- Support 8-channel 1080P/720P HD real-time local recording;
- Support 8-channel high-definition remote video transmission;
- Image automatically recognizes camera resolution;
- Support one-key photo function;

Power Supply:

- Professional vehicle power supply design 8-36V DC wide voltage input design;
- Various protection circuits such as undervoltage, short circuit, reverse connection, etc., suitable for various models;
- Support intelligent power management identification, automatic shutdown when low power, low power consumption after flameout;

Data Storage:

- Adopt special file management mechanism to encrypt data to effectively protect data security;
- Proprietary TF card bad track detection technology not only ensures the continuity of video recording, but also prolongs the service life of TF card;
- Built-in super capacitor to avoid data loss due to abnormal power failure;
- Support TF dual card storage, the maximum capacity of a single card supports 512G;

Extensions:

- Support GPS/BD positioning, high sensitivity, fast positioning;
- Built-in 3G/4G module, support CDMA/EVDO/GPRS/WCDMA/FDD LTE/TDD LTE;
- Built-in WIFI module;

Algorithm:

Support extended RJ45 interface, built-in ADAS, BSD, DSM algorithm (optional);

Peripherals:

- Supports docking of peripherals such as temperature control, passenger flow, oil sense, forward and reverse rotation, and load.

Product Specifications:

Project	Device parameters	Performance
Show	Display Size	10.1 inches
	Resolution	1024*600
	Brightness	600 Brightness IPS
System	Main Processor	ARM Cortex A7
	Operating System	Embedded Linux operating system
	Operating Language	Chinese/English/Traditional Chinese /Russian/Japanese/Italian/Spanish/French
	Operation Interface	Graphical menu operation interface, support touch and voice control operation
Audio and Video	Video Format	PAL/NTSC
	compression standard	H.265
	Image Resolution	1080P/720P
	Video Quality	Levels 1 to 6 are available
	Combination	Various combinations
	Decoding capability	8ch 1080P/720P real-time
	Screen Display	Support 1, 4, 5, 6, 8, 9 screen display
	Audio compression	G.726
	Recording method	Synchronized recording of sound and video
Recording and Playback	Video recording	Manual, alarm
	Video bit rate	Full frame 4096Mbps
	audio bit rate	8KB/s
	storage medium	TF card storage
	Video query	Search by channel and recording type
	local playback	Playback by file
Software Upgrade	Upgrade mode	Manual upgrade, remote upgrade
Interface	audio input	1 channel
	video input	8 channel
	Alarm input	4-channel alarm input by default, 6-level signal input can be customized
	Alarm Output	1 channel alarm output
	Ignition Input	1 channel ACC signal
	Serial Port	1 485 interface (can be customized)

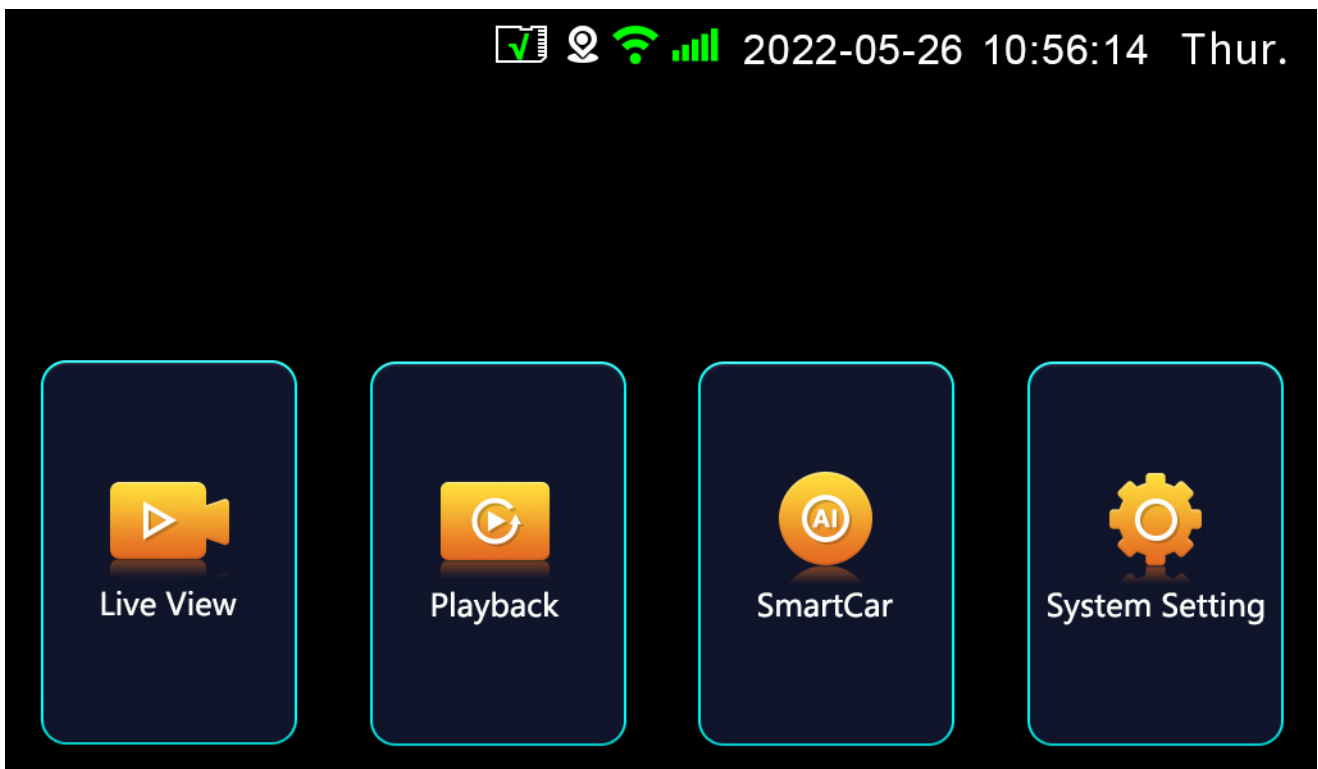

Extensions	GPS/BD	GPS or BD, GLONASS
	3G/4G	Support CDMA/EVDO/GPRS/WCDMA/FDD LTE/TDD LTE
	WIFI	Support 2.4G WIFI
Other	Power Input	DC: 8V~36V
	Power consumption	Standby 3mA Maximum power consumption 18W @12V 1.5A @24V 0.75A
	Operating temperature	-20~70°C
	Compressed storage capacity	1080P 0.8G/hour/channel 720P 500MB/hour/channel D1 250MB/hour/channel

Table 1: 8-CH All-in-One Product Specification List

3.Product Appearance Characteristics

Main Menu

Figure_Home

The functions corresponding to each menu item are defined as follows:

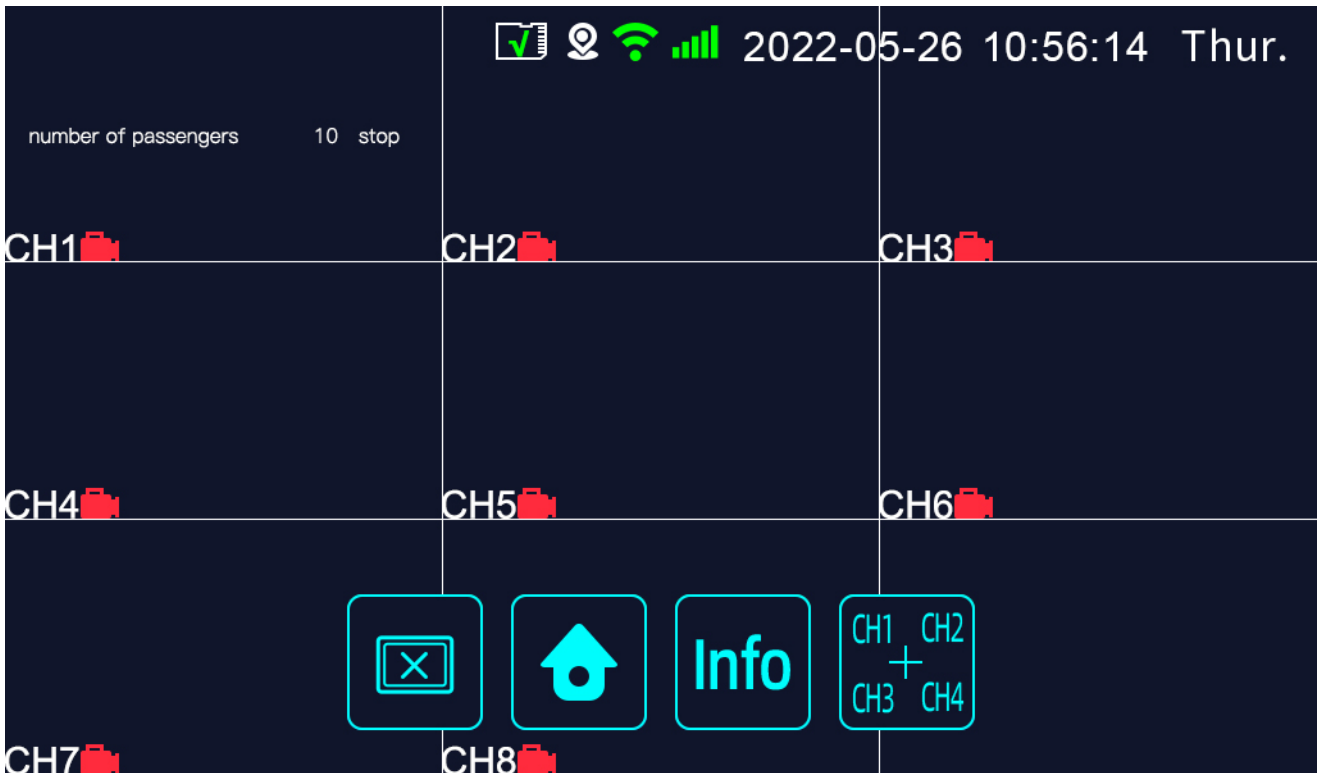

⟨**Video Surveillance**⟩: Watch real-time video, image snapshot, view network status information, set split screen display;

⟨**Video Playback**⟩: Play back the video, view the video file and the captured picture and related operations;

⟨**Intelligent Driving**⟩: BSD camera enablement, calibration, settings;

⟨**System Settings**⟩: System function settings;

3.1 Video Surveillance

Figure_Video Surveillance

⟨Turn Off The Screen⟩:  turn off the screen;

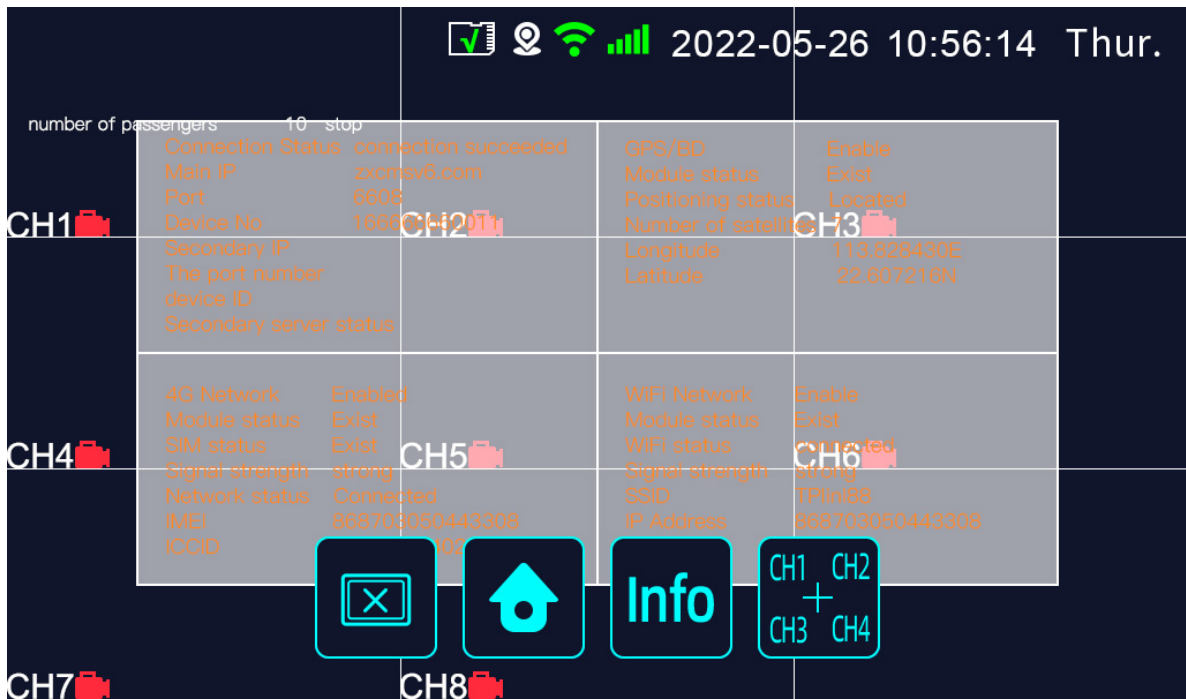

⟨Menu Home⟩:  Back to Menu Home;

⟨Info⟩:  View IP address, 4G network, location, wireless network and other status

information;

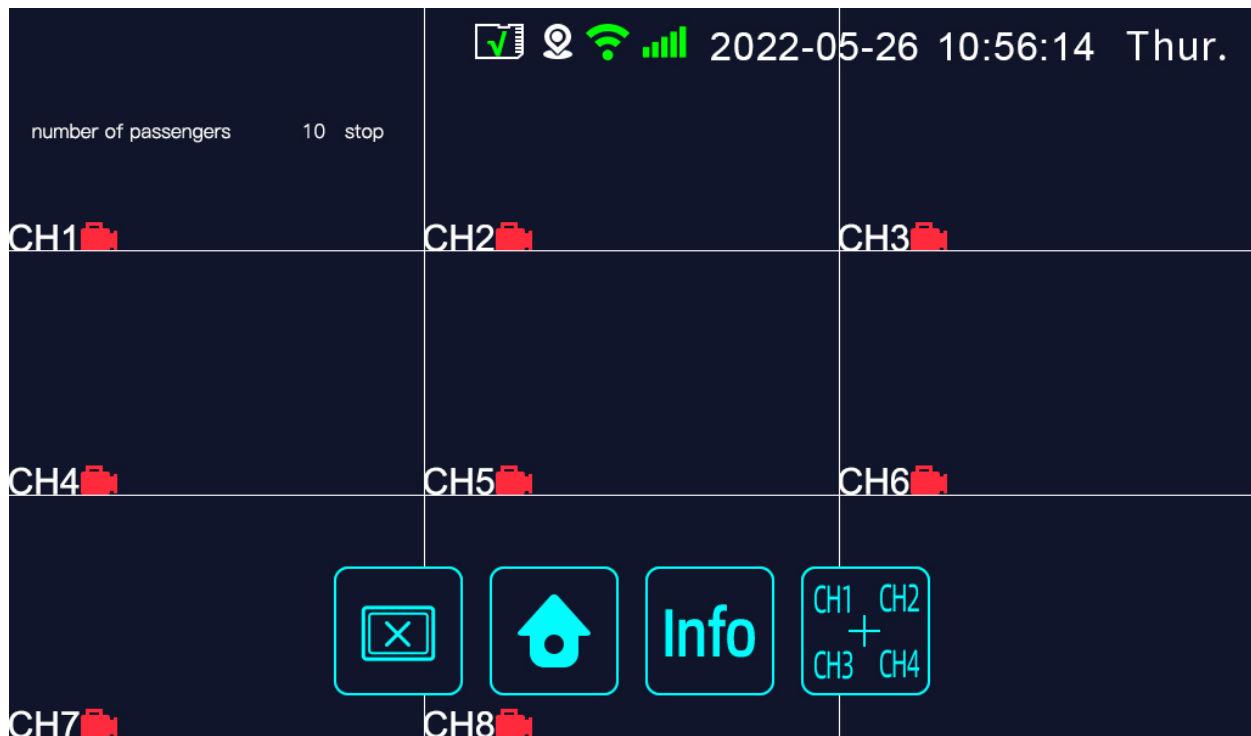

⟨Split Screen Display⟩:  Set the video screen split screen display.

3.1.1 Info Status Information

3.3.1 BSD Camera Settings

Figure_BSD camera settings

〈**BSD Camera Settings**〉: Front, Rear, Left and Right Cameras;

〈**BSD Master Switch**〉: Open/Close;

3.3.2 BSD Camera Calibration

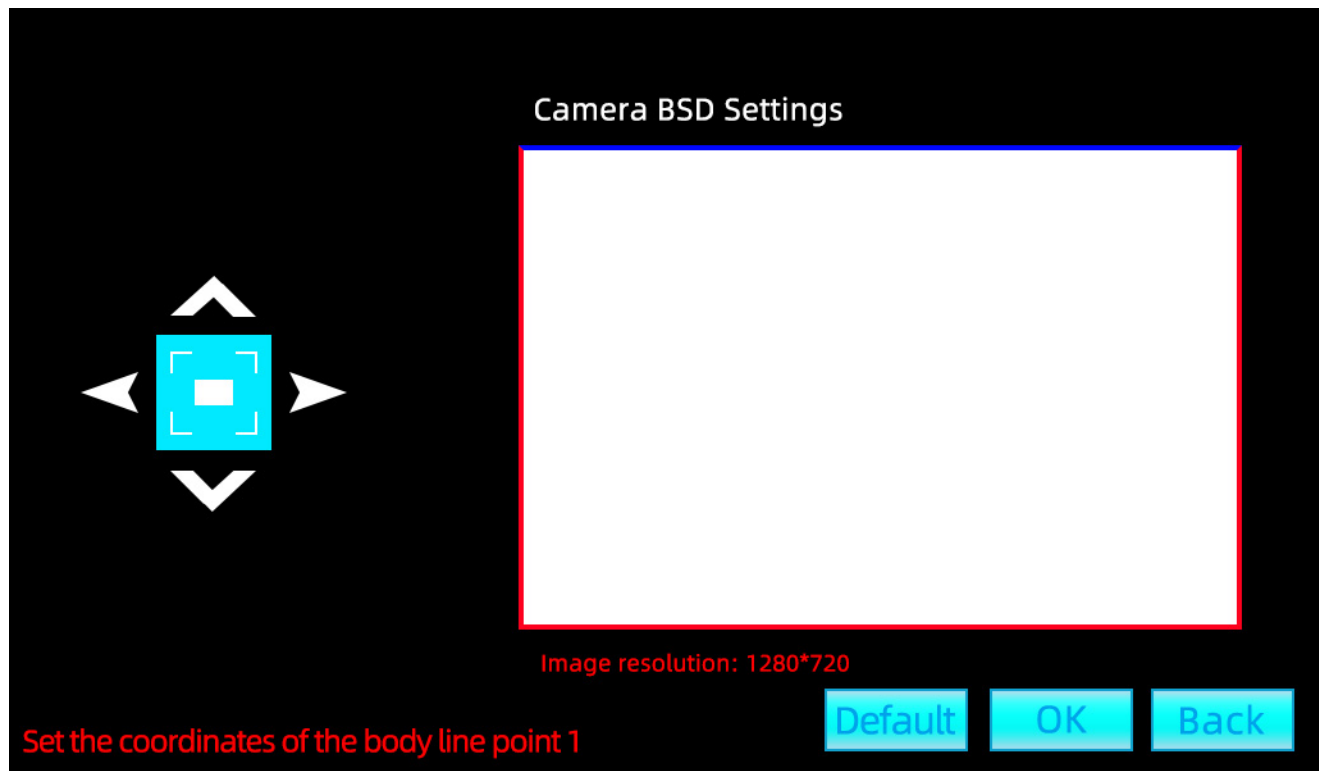

Figure _BSD camera calibration

Here is a schematic diagram of the BSD calibration:

The red arrow icon is used to move the red line up and down  The green arrow icon is used to move the green line left and right,

 The yellow arrow icon is used to move the yellow line up and down. Click "Next" to continue calibration.

The area of the left and right boxes is the alarm area, and the box can be set.

Setting method: There is an adjustable red dot on each corner of the box, through the arrow on the

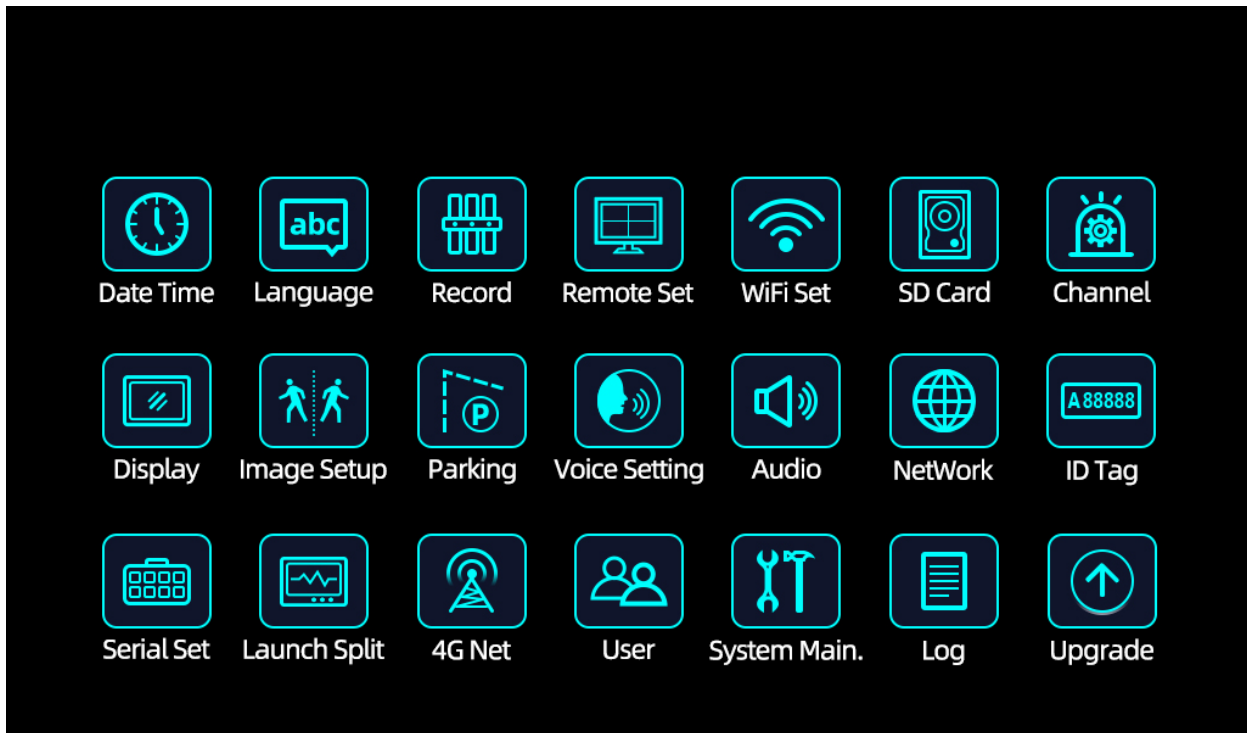

You can move the red dot up, down, left and right.

click  Toggle red point, adjust next red point.

Click the "Save Results" icon when the calibration is complete.

3.4 System Settings Menu

Figure_System Settings Menu

3.4.1 System Settings

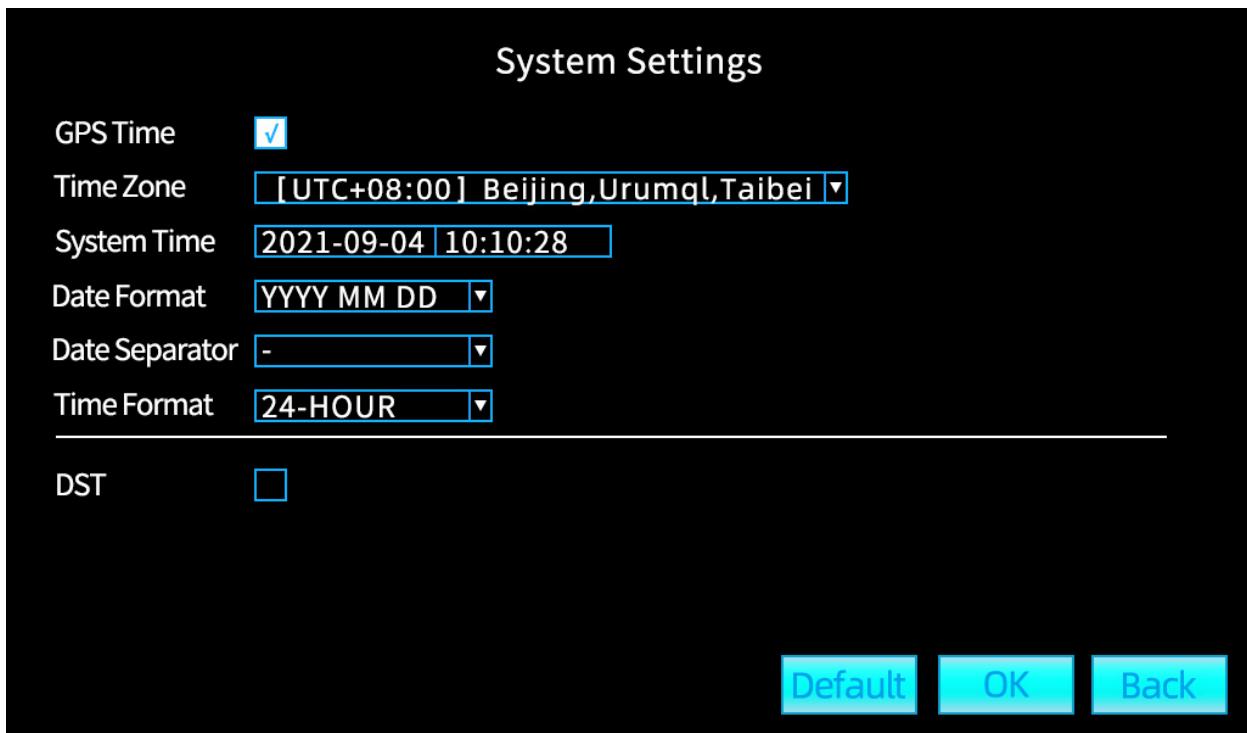

Figure 1 System Settings

〈**GPS Time**〉: If this function is enabled, the device will automatically check the time after each boot and positioning.;

〈**Time Zone**〉: China chooses UTC+8:00 Beijing;

〈**System Time**〉: Modify the corresponding date and time;

〈**Date Format**〉: There are multiple formats to choose from;

〈**Date Separator**〉: -;

〈**Time Format**〉: 24-hour clock and 12-hour clock;

〈**Summer Time**〉:

3.4.2 Language Settings

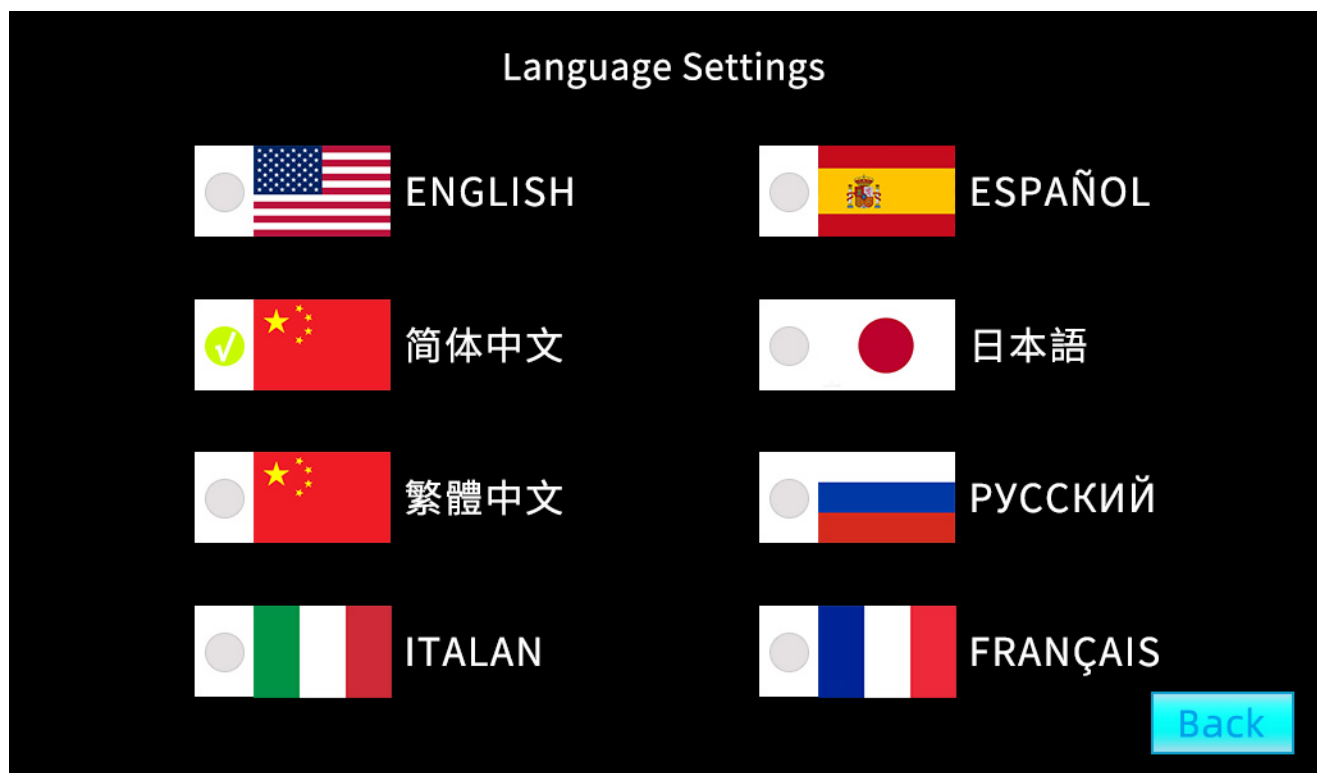

Figure 2 Language settings

〈**Language Settings**〉: Supports multiple languages. Click to select the corresponding flag.

3.4.3 Recording Settings

The image shows a 'Recording Settings' menu with two columns of options. The left column includes: Channel (1), On/Off (On), Duration (15 Min), Compression (H.265), Resolution (720P), Frame rate (FPS) (25), Bit Rate Type (VBR), Quality (high), Bit Rate(Kb/S) (1664), 1 frame interval (2), and Video/Audio (checked). The right column includes: Extra Stream, D1, 6, VBR, low, 239, 2, and Video/Audio (checked). At the bottom right are 'OK' and 'Back' buttons.

Setting	Value	Value
Channel	1	
On/Off	On	
Duration	15 Min	
Compression	H.265	Extra Stream
Resolution	720P	D1
Frame rate (FPS)	25	6
Bit Rate Type	VBR	VBR
Quality	high	low
Bit Rate(Kb/S)	1664	239
1 frame interval	2	2
Video/Audio	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>

Figure 3 Recording settings

⟨**Channel**⟩: Select channels 1, 2, 3, 4, 5, 6, 7, 8, and All;

⟨**Video Switch**⟩: On/Off;

⟨**The Video Time**⟩: 15 minutes, 30 minutes, one hour, two hours;

⟨**Encoding Scheme**⟩: H.264 and H.265 modes, H.265 saves more memory than H.264 encoding (about half);

⟨**Resolution**⟩: The resolution can be set to D1/960H/720P/1080N;

⟨**Frame Rate FPS**⟩: 18/19/20/21/22/23/24/25;

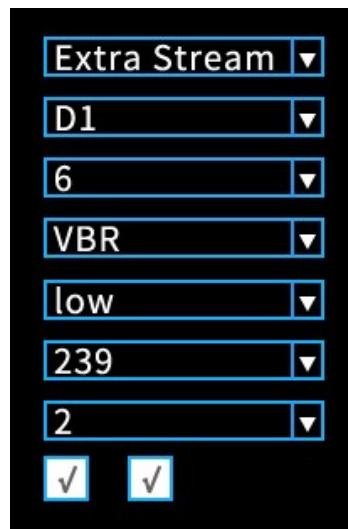

⟨**Stream Control**⟩: Limited code stream/variable code stream, the default is variable code stream. According to the image change, the code stream changes with;

⟨**Picture Quality**⟩: very poor, poor, average, good, very good, best;

⟨**code stream value**⟩: dynamic, not configurable;

⟨**One Frame Interval Kb/s**⟩: 1/2/3/4/5/6/7/8/9/10/11;

⟨**Video/Audio**⟩: Video/Audio on or off;

Small stream configuration is the stream definition setting for remote video monitoring:

⟨**Encoding Mode**⟩: Secondary stream 1;

⟨**Resolution**⟩: You can choose CIF/D1, the default is D1;

⟨**Frame Rate FPS**⟩: 1/2/3/4/5/6/7/8;

⟨**Stream Control**⟩: Limited code stream/variable code stream, the default is variable code stream. According to the image change, the code stream changes with;

⟨**Picture Quality**⟩: very poor, poor, average, good, very good, best;;

⟨**Code Stream Value**⟩: dynamic, not configurable;

⟨**One Frame Interval Kb/s**⟩: 1/2/3/4/5/6/7/8/9/10/11;

⟨**Video/Audio**⟩: Video/Audio on or off;
